

THE ROAD TO THE MOON OPEN TODAY, OR FOR WHAT REASON SHOULD CIVILIZATION REPLACE THE MEDIEVAL TERRESTRIAL "SHIP OF FOOLS" ON THE MULTI-PLANETARY REUSABLE SPACECRAFT SIMILAR TO ELON MUSK'S "STARSHIP"?

Re: This is a historic opportunity for US President Donald Trump. The road to the Moon for humanity has been open since September 28, 2026 at 05:049 LTC – [universal lunar time, which is absolutely the same for all 24 Earth time zones]. Starship has completed its first historic full-fledged test orbital flight around the Earth. The ideology of a multiplanetary civilization is becoming a reality.

"The flight is a turning point in history. It was the first time that Starship entered low-Earth orbit for the first time. All previous flight tests were conducted on suborbital trajectories."

From this moment on, the United States becomes the undisputed leader in space colonization. This leadership was initially held by the USSR on October 4, 1957. In 2026, the palm finally passed to the United States. *Now the United States is determining the trajectory of the further development of the cosmic ideology of civilization.*

Russia and China will either catch up with the United States or fall behind forever. The United States plans to increase the number of rocket launches to 10,000 per year by 2035, while Europe also wants to increase the number of launches to 62 per year.

It is only a matter of time before the United States builds strategic military bases on the Moon? These will be anti-meteorite protection devices.

The United States Space Force was established on December 20, 2019. *ru.wikipedia.org**; *ru.ruwiki.ru*.

After the establishment of a base on the Moon, the United States will lose all interest in the ISS and will stop delivering people and cargo to the ISS. Littered to the limit, NOO is simply dangerous and uncomfortable.

Spaceships USA are universal: they can operate equally successfully on LEO, on the Moon, and autonomously beyond their borders.

Roscosmos can be left alone on LEO at the ROS and ISS stations in the midst of clouds of debris?

This flight of Elon Musk's Starship is a direct fulfillment of the "Directive of the President of the United States Donald Trump No. 1 on US space policy" dated December 11, 2017. Donald Trump has been conducting total space industrialization in the United States since 2017.

The importance of President Trump's activities in colonizing the moon and settling the near-solar space cannot be overestimated.

These are the outstanding and unparalleled efforts of the President of the United States, which make the United States the absolute leader of the modern world.

The colonization of the Moon will be carried out according to the Coordinated Lunar Time (*LTC*) standard, synchronized with the Coordinated Terrestrial Time (*UTC*) standard.

LTC is the unified (common) reference standard Keplerian time for the Earth—Moon binary planetary system with a relativistic Einstein correction [1 second every 50 years, since time on the Moon is shorter than time on Earth].

According to estimates by the Congressional Budget Office, the total cost of this program over 20 years [2026-2046] could reach \$1.2 trillion. No other country in the world makes such huge financial efforts in space colonization.

The United States does not have a single real strategic competitor in space today out of all 193 UN members. The NASA team in the USA is ahead of any other teams from all other countries of the world combined in global development progress.

Thirteen years ago, on January 17, 2013, my invention, the "Unified Universal Calendar for Humanity," was officially proposed for consideration for inclusion on the agenda of the G-20 Group meeting.

This event was supposed to improve the accuracy of navigation in space. My proposal has zero error, unlike the existing ancient Julian system [46 BC], which has the error of lengthening the year by 675 seconds per year, and the error of the Gregorian medieval calendar system [1582 AD] in the amount of 27 seconds of elongation relative to the duration of the tropical Earth year, calculated by Kepler in the Rudolphin tables [1627].

This important decision about the Keplerian correction of the calendar can be made by: US President Donald Trump. with the support of Chinese President Xi Jinping and Russian President Vladimir Putin?

But Donald Trump can do it alone. He historically has such rights. This was already done by US President Woodrow Wilson in 1918, when he adopted the Standard Time Act [the law on 24 meridian time zones, 1 hour in size], known as the "Calder Act", which the whole world uses to this day.

Humanity, in connection with the coming era of colonization of the Moon [Exodus to the Moon – the kind of "lunar Passover"], should switch to the unified reference standard of the lunar-terrestrial 13-month calendar and to the unified

(common) "coordinated lunar time" [LTC-standard] for the Moon and the Earth, as the double planet, synchronized with Earth's coordinated time [UTC].

This circumstance is key to ensuring the necessary accuracy of space flights, their safety and reliability, without which neither manned astronautics nor automatic systems, including Golden dome-type missile defense systems, can exist.

Abstracts. "The Ship of Fools " ("Das Narrenschiff", Basel, 1494), a satirical and didactic suite in verse.

The eruption of the Tiro volcano on the island of Santorini. The Exodus [or Passover] of Jews from Lower Egypt, on the first full Moon after the vernal equinox on the night of 14-15 Nisan [April] in 1446/1440 BC. This event took place 3472/3466 years ago [1446/1440 +2026=3472/3466].

Attempts to seize world domination, launched by the Egyptian anti-Semitic Pharaoh Thutmose III, continued by the Greek Macedonians under the command of Alexander the Great; the Carthaginian troops under the command of Hannibal; the troops of the Roman emperors; the Mongol-Tatars of Genghis Khan, the troops of Tamerlane, the Franco-European troops of Napoleon I Bonaparte; and many other world leaders under various ideological pretexts – as links the same ideological chain. The entire history of mankind on Earth over the past 12,000 years [since the end of the fifth Ice Age] has been one continuous war. A real "ship of fools"?

There were two World Wars between "earth fools". Is the Third one brewing today?

It is only a matter of time before the United States builds strategic military bases on the Moon? The United States Space Force was established on December 20, 2019. *ru.wikipedia.org**; *ru.ruwiki.ru*.

The space multiplanetary ideology that Elon Musk is forming today can serve as a good basis for changing and rejecting the global paradigm of the earthly "Ship of Fools"?

The Asia-Pacific Economic Cooperation (APEC) Summit will be held in the Chinese city of Shenzhen on November 18-19, 2026. This is the thirty-third annual meeting of APEC economic leaders. *kommersant.ru*; *ria.ru*; *ru.wikipedia.org**. The leaders of the United States, China and Russia will meet there.

In the period from December 14 to December 15, 2026, a summit of the leaders of the G20 countries is scheduled in Miami (Florida, USA), at which the leaders of these three leading countries of the world can also meet: the United States, Russia and China.

Thirteen years ago, on January 17, 2013, my invention, the "Unified Universal Calendar for Humanity," was officially proposed for consideration for inclusion on the agenda of the G-20 Group meeting.

This important decision can be made personally by US President Donald Trump, just as US President Woodrow Wilson did in 1918. Woodrow Wilson

approved the Standard Time Act [the law on 24 meridian time zones, each 1 hour in size], known as the "Calder Act".

Such a decision would be the logical result of the "Directive No. 1 on US Space Policy" dated December 11, 2017, signed by President Donald Trump.

This decision can be supported by both Chinese Leader Xi Jinping and Russian President Vladimir Putin. It would be *the Triple Treaty of World-historical significance*.

Keywords. The change of leadership in space colonization in 2026. "Ship of fools." "Donald Trump's Directive No. 1 on US space policy." The Julian calendar. The Gregorian calendar. The Law on Standard Time. The unified (common) Keplerian reference standard for Coordinated Lunar time [LTC standard] for the Earth-Moon binary planetary system. Reusable rocket systems instead of disposable ones. *Strategic military bases of US on the Moon? The United States Space Force.* Georges Lemaitre and Albert Einstein. Donald Trump and Woodrow Wilson. Sebastian Brant. The Golden Dome. the Triple Treaty between the leaders of the United States, Russia and China.

Sebastian Brant, [1457–1521]. "The Ship of Fools" (Das Narrenschiff, Basel, 1494),

In the Middle Ages, the famous book called "The Ship of Fools" was published. This book, Ship of Fools, was a huge success.

It was translated into foreign languages, including Latin, and spawned a whole literature of imitations — the so-called Narrenlitteratur.

The ideas of this book are not outdated to this day. The author is Sebastian Brant [Sebastian Brant, 1457-1521], a German humanist. Since 1489, he has been a doctor of law in Basel. Since 1501 — City Secretary (Chancellor) Strasbourg.

He is the author of numerous scientific, journalistic and poetic works in German and Latin. Among the works of Brant Sebastian, the famous "Ship of Fools" stands out ("Das Narrenschiff", Basel, 1494), a satirical and didactic suite in verse that is relevant today.

The first to be mentioned is the *anti-Semitic* Egyptian Pharaoh Thutmose III [1496 BC - 1425 BC]. He ruled Egypt from 1485 BC to 1425 BC. He died on March 4, 1425 BC. His father, Thutmose II, took over at the age of 21 from 1492 BC. He died in 1485 BC at the age of 28, when his son, Thutmose III, turned 11/12 years old. The priests proclaimed Thutmose III the new Pharaoh. The priests took the young Pharaoh to the temple for education. His stepmother Hatshepsut became regent-Pharaoh for life [from 1485 to 1464].

She ruled Egypt for about 22 years together with her favorite, the Jew Moses with the Egyptian name "Senmut" [Senemut?] Although she was formally listed under the incestuous laws of succession to power in Egypt as the "wife" of her own minor stepson, who was 17 years younger than her and had never been her real husband. The priests used the infant Thutmose III to constantly put pressure on the female pharaoh Hatshepsut.

Thutmose III was in fact the half-son [stepson] of Hatshepsut. But by this time she already had a real incestuous marriage, recognized by the priests, with her half-brother Thutmose II.

The real father of her two daughters was probably a Jewish nobleman, Moses Senmut [1526/1520 - 1406/1400 BC], who was raised by Hatshepsut's mother in the palace of Pharaoh Thutmose I [ruled from 1504 to 1492 BC]. Moses grew up in Egypt as an adopted son in the family of Pharaoh Thutmose I. the father of Queen Hatshepsut and her half-brother Thutmose II [1513-1485 BC], that is, Moses-Senmut was also de facto in the role of her half-brother.

All of them, as children, grew up together in the same family. Hatshepsut's mother, Queen Ahmose, the Great royal Consort, adored Senmut-Moses – (whose ancestor was the famous Egyptian advisor to the pharaoh, the Jew Joseph the Beautiful?) - because she never managed to give birth to her own male child (a boy). Senmut-Moses, when he grew up and reached adulthood, became the favorite husband of Queen Hatshepsut.

Both daughters [Merita and Nefrura] Hatshepsut was most likely her children by Senmut. Both were later declared priestly queens of Egypt and became wives of

Pharaoh Thutmose III, their half-brother, according to the incestuous law of succession to power. Throughout the reign of Pharaoh Hatshepsut, Moses-Senmut was the general in chief of all Egyptian troops.

Pharaoh Thutmose III of ancient Egypt [1496-1425 BC] was the son of the second wife of Thutmose II [1513-1485 BC], the husband of Queen Hatshepsut [1513-1464 BC].

In 1464 BC, Pharaoh Hatshepsut died after about 22 years of rule. A young, athletic student of Moses, Senmut, ascended the throne. Moses-Senmut handed over command of the Egyptian army to the new Pharaoh. In the beginning, there were no contradictions between them. But the priests were not satisfied with this situation, since in Lower Egypt the Jews enjoyed the patronage of Moses-Senmut and had privileges.

Moses was probably born in 1526/1520 B.C. In 1446 [or 1440, according to the second version of the ancient chronology] BC he, along with his brother Aaron and sister Miriam, led the Jews from Lower Egypt to the Sinai Peninsula after the eruption of Mount Tiro on the island of Santorini.

Santorini (also known as Tyro) is an active shield volcano on the island of Tyra (also known as Santorini or Fira) in the Aegean Sea, in the Cyclades archipelago, Greece. *ru.wikipedia.org* *; *ru.ruwiki.ru*; *dic.academic.ru*.

It was the famous Exodus or Passover [Jewish Passover] on the first full Moon after the vernal equinox on the night of 14-15 Nisan [April] 1446/1440 BC.
--

After the eruption of the Tyro volcano on the island of Santorini in the Aegean Sea. Lower Egypt was covered with volcanic ash.

On the scale of volcanic activity, the eruption had a score of 7 points, which is comparable to the eruption of Mount Tambora and 3 times stronger than the eruption of mount Krakatoa in 1883. *ru.wikipedia.org**; *ru.ruwiki.ru*.

A giant caldera was formed — a vast depression (diameter up to 14 km, wall height in some places up to 400 m), which instantly filled with the waters of the Aegean Sea. *ru.wikipedia.org **; *votpusk.ru*.

The eruption spewed out a colossal amount of red-hot ash and pumice. The ash cloud extended over a distance of 200-1000 km. *ru.wikipedia.org **; *ru.ruwiki.ru*. The explosion of the volcano triggered a tsunami wave up to 100 m high (according to some estimates, up to 200 m).

A tsunami wave has hit the northern coast of Crete, destroying the Palace of Knossos and causing significant damage to the Minoan civilization. *ru.wikipedia.org**; *heritage-balkan.livejournal.com*; *coral.ru*. The slopes of the volcano collapsed under their own weight, along with the deserted settlements. *ru.wikipedia.org **; *ru.ruwiki.ru*

All sources of drinking water in Lower Egypt were littered with ash and proved unusable for either humans or animals.

In history, this event is known from ancient papyrus and from the Bible as the "10 Plagues of Egypt." At that time, about 20% of the entire population of the Ancient World lived in Egypt. The Hyksos pharaohs ["shepherds"] ruled Lower Egypt. The capital of the Hyksos pharaohs was the city of Avaris.

Their vassals for a long time [at least 200 years] were the pharaohs of Upper Egypt with their capital in Thebes.

But at one point, the situation reversed. After the eruption of the Tyro volcano, the pharaohs of Upper Egypt gained the upper hand in this confrontation. *The Jews of Lower Egypt were powerless against the forces of Nature of volcanoes*.

Crowds of Jewish refugees from Lower Egypt were prevented from entering Upper Egypt by the army of Pharaoh Thutmose III of Upper Egypt. The nearest sources with suitable drinking water remained only near Mount Sinai in the Sinai Peninsula.

In Upper Egypt, Jews from Lower Egypt were offered the status of slaves by the priests. Jews from Lower Egypt did not agree with this status. This was the most likely reason for the exodus of Jews from Lower Egypt to the Sinai Peninsula in 1446/1440 BC. Egypt needed slaves. Therefore, an army was sent for the Jewish fugitives to return and subjugate them. The Jews of Lower Egypt took all their livestock with them and took their wealth.

During the chase, the Egyptian army from Upper Egypt was hit by a tsunami wave while crossing the Red Sea in the Salt Lakes region, when the Jews had already crossed its bottom to the Sinai Peninsula.

This "sea", consisting of several interconnected salt lakes, was unstable. It connected the Red Sea with the Mediterranean Sea during high tides. Subsequently,

the Suez Canal was built on this site, as a development of the "canal of the Pharaohs" [the canal of the four kings or the Trajan River from the Gulf of Suez to the Nile River].

At the time of the earthquake during the eruption of the Tiro volcano, the water first receded and moved away from the Mediterranean coast. Therefore, the Jews easily walked along the bottom of the Red Sea from Lower Egypt to the Sinai Peninsula along with herds of animals. But then the tsunami wave returned and covered the entire Nile Delta in Lower Egypt in the area of the Salt Lake complex. At that moment, the army of the Pharaoh of Upper Egypt was marching there, and it sank along with about 600 war chariots? The Hyksos Jews thus escaped slavery from the pharaoh of Upper Egypt.

After such a defeat, Thutmose III avoided further direct military clashes with Jews under the leadership of the former general and Supreme Commander of the Egyptian army, Moses Senmut, who created a powerful disciplined modern Jewish national army from the Jews who left with him. At the same time, Thutmose III was officially considered the "*Napoleon of the Ancient World*" for his outstanding victories and personal courage. He could defeat anyone, but not his teacher, Moses Senmut.

But it was only after 40 years of wandering in the desert that the Jews finally entered the Promised Land [in Canaan] in the area of the fortress of Jericho with trumpets under the leadership of Joshua. This event took place around 1406/1400 BC [$1446/1440 - 40 = 1446/1440$].

In the year of the Jews' entry into Canaan, Moses Senmut died. He did not enter Canaan. Moses lived 120 years. His disciple Joshua led the Jews to Canaan.

Until 1425 BC, the Jews could not enter Canaan in principle due to the strong opposition of the troops of Pharaoh Thutmose III, who garrisoned all the cities of Canaan and Syria. The garrisons of Thutmose III's soldiers-controlled Egypt's trade routes with Babylon and with China (the Silk Road). Pharaoh Thutmose III died in 1425 BC. The power of the Egyptians in Canaan weakened. This allowed the Jews to finally enter Canaan in 1406/1440 BC. From that moment on, the Jews began the conquest of Canaan and the creation of their own ancient nation-state.

But the story of the Exodus [of the Jewish Passover] has continuation in our cosmic modernity. The so-called "Christian point of chronological reference" is connected with it. Conventionally, 5508 BC is considered such the Christian point "from the biblical mythical Creation of the world."

Christian Paschal celebrations are being counted from this year. The calculation of the Christian Easter algorithm was carried out in 1800 AD by the German Karl Gauss [1777-1855], the "king of mathematicians all over the world".

In 1800, Gauss, an astronomer and mathematician, calculated the algorithm of the first year of the Christian Easter after the fact of the "Resurrection" of Jesus Christ, that is, he accurately calculated the 1st anniversary of Easter.

According to his mathematical calculations, Jesus Christ was crucified in 753 AUC [5508 BC from the mythical biblical date of Creation].

Ab urbe condita (related to Latin. Anno Urbis Condita (AUC/a.u.c.) — "from the foundation of the City of Rome") is a type of chronology used by Roman historians to designate the year. *ru.wikipedia.org*. Traditionally, it was taken as 753 AUC as the date of the founding of the City of Rome. *ru.wikipedia.org*.

Christians celebrated the first Christian Easter [the 1st year of the Christian faith or the new era - AD] in the year 754 AUC [that is, in the year 5509 year from the Creation of the world or in the year 3761/3762 year according to the Jewish calendar].

October 7, 3761 BC is the official date of the beginning of the Jewish calendar, which corresponds to the moment of the New Moon of the first month at the creation of the world. *ru.wikipedia.org* *; *ru.ruwiki.ru*. This chronology is part of the Jewish calendar and is currently officially used in Israel along with the Gregorian calendar. *vk.ru*.

Since then, Christians have celebrated annually the date of the Resurrection of Jesus Christ after his Crucifixion in 753 AUC. This is the modern Christian calendar of the Catholic Vatican. This is the Easter calendar. Easter is the English name of the Christian holiday, dedicated to the Resurrection of Jesus Christ. In some traditions, the name Pasch or Pascha is also used. *en.wikipedia.org*; *translate.academic.ru*.

BREZHNEV L.I., GENERAL SECRETARY OF THE CENTRAL COMMITTEE OF THE CPSU, IS THE APOTHEOSIS OF STUPIDITY IN HISTORY?

The Nobel Committee has twice tried to nominate Sergei Korolev for the Nobel Prize — the first time in connection with the launch of the first artificial satellite of the Earth in 1957, the second — after Yuri Gagarin's first flight into outer space in 1961.

However, both times the Nobel Committee was rejected by the Soviet leadership. *kbsu.ru*; *1tv.ru*; *rg.ru*; *aif.ru*. The main reason for the refusal is the alleged secrecy regime. The identity of the Queen has long remained a formal state secret.

Khrushchev's reply stated: "One person cannot be called a [Nobel Laureate], since the creator of new technology in the USSR is the entire [Soviet] people." *topwar.ru*; *vmeste-rf.tv*; *rodina-history.ru*; *rg.ru*.

According to some reports, Nikita Khrushchev made the decision on this issue together with the de facto "Presidium of the Central Committee of the CPSU," in which Leonid Brezhnev, Khrushchev's direct political protege, played an important role. They "pharisaically" thanked the Nobel Committee for the offer, but explained that large teams had participated in the achievements, and it was allegedly

impossible to single out one or two people from them. *ussr.rhga.ru; vikent.ru; topwar.ru.*

Actually, the Nobel Committee did not mean Khrushchev and Brezhnev themselves. And the USSR leadership did not want to make only Sergei Korolev a Nobel laureate. According to open data, there were no more repeated requests from the Nobel Committee from Stockholm after Gagarin's flight. *topwar.ru.*

In fact, *Grigory Alexandrovich Tokaev* [1913-2003] knew Sergei Korolev well from his work with him before moving to the British occupation zone in Berlin in 1948. The group of Soviet experts in Germany was headed by General Vasily Stalin, the son of I.V. Stalin.

Later, Tokayev became a professor in London and also worked in the team of Wernher von Braun in the United States under the Apollo program.

They work together with Kondratyuk [Shargey], who allegedly crossed the front line in 1942 and actively worked on the V-2 project in the team of Wernher von Braun?

Kondratyuk, a student of Tsiolkovsky, refused Korolev's offer in 1933 to work at the Russian Research Jet Institute on combat missiles.

The Apollo program of the flight to the Moon is entirely Kondratyuk's program, which Kondratyuk calculated and provided to Tsiolkovsky. NASA simply approved it and took it as the basis for the entire development. Yuri Vasilyevich Kondratyuk (real name — Alexander Ignatievich Shargey; 1897-1942) was a Soviet engineer, one of the founders of cosmonautics.

His ideas and calculations had a significant impact on the development of this field, and some of them were rediscovered and used in the American Apollo lunar program.

In official documents, S.P. Korolev appeared under the pseudonym of "Professor K. Sergeev." Korolev's achievements were highly appreciated by the Nobel Committee. *novochag.ru; aif.ru. ru.wikipedia.org; roscosmos.ru; altlib.gif; ru.ruwiki.ru; museumgagarin.ru.*

It was not the Soviet designers who lost the flight to the Moon to the Americans in 1968. *The Soviet politicians lost. Brezhnev-Andropov team lost to Kissinger-Nixon team.*

Today, no one doubts the *incompetence* of the leaders of the USSR-Russia, starting with the "cornhusker" Khrushchev and ending with the "alcoholic" Yeltsin?

Brezhnev was an *outspoken drug* addict who awarded himself the *Order of Victory* [1978], which was then publicly *taken away from him in disgrace in front of the whole world after his death* [1989].

After the illiterate Khrushchev, who relied on his highly literate and educated wife Kukharchuk from Western Ukraine, L.I. Brezhnev, a real clinical "psychotic patient", came to power. Brezhnev had a severe wartime concussion.

He suffered from a mental disorder and was periodically *completely inadequate*. Brezhnev, for example, demanded that after watching the movie, the fictional movie character Stirlitz be awarded the title Hero of the Soviet Union. Henry Kissinger was aware of this fact.

The inadequate Brezhnev became the political end of the USSR. The real work in the USSR on economic development was carried out by two luminaries: the "Stalinist" Kosygin and the industrial professional Podgorny. Brezhnev was afraid of competition and loss of power. Therefore, he got rid of both of the most important specialists.

After 20 years of prosperity, the USSR stagnated from 1966 to 1986. Brezhnev dismissed the Chairman of the Supreme Soviet of the USSR, Podgorny, and the Chairman of the government, Kosygin, allegedly died himself. Economic reforms stopped immediately.

Further, in 1986, the Central Committee of the CPSU began "detente", "perestroika", and in 1991 the USSR ceased to exist.

In particular, did Brezhnev prevent Jews from leaving the USSR, and did he have a pathological vindictiveness and passion for awards? Officially, he had *114 awards, including 64 orders and 50 medals*.

The tunic with the awards *weighed less than 6 kg*. Among these awards were "Gold Stars", as especially valuable.

Officially, Leonid Ilyich Brezhnev had *5 Soviet "Gold Stars"*, of which 4 medals of the Hero of the Soviet Union and 1 medal of the Hero of Socialist Labor. *picturehistory.livejournal.com*.

In addition, he had Hero medals and "Golden Stars" and "Sickles and Hammers" from other socialist countries, with a total of *14 foreign awards*: *picturehistory.livejournal.com*.

In total, this amounted to: three "Golden Stars" from the GDR [3]; one "Golden Star" from Cuba [1]; three "Golden Stars" from Bulgaria [3]; one "Golden Star" [1] and "Hammer and Sickle" [1] from Mongolia; three "Golden Stars" from Czechoslovakia [3]. Gold Medal of the Hero of Labor of the Socialist Republic of Vietnam [1]; Order of the Golden Star (Hungary) [1]. In total, Brezhnev had *14 foreign Gold Star medals*": $3+1+3+1+1+3+1+1=14$.

In total, Brezhnev had 53 "Golden Stars" among all awards, of which 34 medals were duplicates of some "Golden Stars" [$53-34=19$] for ceremonial tunics. *picturehistory.livejournal.com*. *picturehistory.livejournal.com*; *bolshoyvopros.ru*.

Thus, officially, Brezhnev had *5 Soviet and 14 foreign Gold Star medals* [total: *19 Gold Star medals*], and unofficially, along with duplicates, 53 copies of the Gold Star medals. *picturehistory.livejournal.com*; *ok.ru*.

Brezhnev really want to get all the laurels of Stalin and Zhukov for himself at the same time?

In 1976, Brezhnev was "confirmed" in the rank of Marshal of the Soviet Union. After that, Brezhnev literally forced Marshal of the Soviet Union Zhukov to write in the book "Memoirs and Reflections" that Marshal of the Soviet Union Zhukov allegedly came to Colonel Brezhnev during the Great Patriotic War to "*consult*" with Colonel Brezhnev on military strategy on the whole Soviet-German front, which was not true? *It was a pure and outright lie by a clinical idiot?*

And what are all these "Memories and reflections" of Marshal Zhukov himself worth after that? Who would believe him after that? He put the pathological liar, the psychotic Colonel Brezhnev, above himself?

Marshal of the Soviet Union G.K. Zhukov with 4 Stars of the Hero of the Soviet Union

In fact, Brezhnev had a meeting with Khrushchev at the front, and not with Zhukov, whose actions they discussed together.

Brezhnev and Khrushchev at the front [1941-1945]

Brezhnev and Khrushchev at the front [1941-1945]. They didn't have a single Hero Star during the war.

Khrushchev wanted to be awarded the rank of Marshal of the Soviet Union. He "received" all the Stars of the Hero [of the Soviet Union and Socialist Labor] in peacetime.

У Хрущева было 4 Звезды Героя – больше, чем у Сталина. За столом сидит его жена Кухарчук и Эрих Хонеккер, руководитель ГДР.

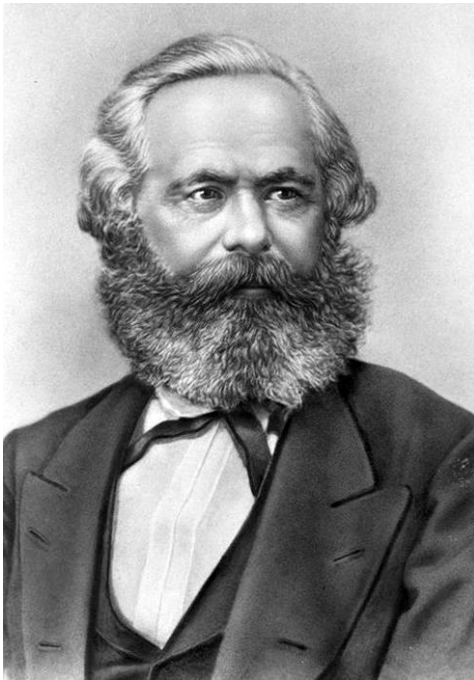

Portrait of Generalissimo of the Soviet Union I.V. Stalin, who received 24 awards: 15 Soviet and 9 foreign. He had two Hero Stars [of the Soviet Union and Socialist Labor]

Marshal of the Soviet Union I.V. Stalin actually wore only one Star of the Hero of Socialist Labor. For some reason, he did not wear the Star of the Hero of the Soviet Union.

I.V. Stalin's psychology was based on two main sources. The first was K. Marx, whose monograph "Kapital" he completely reviewed in his youth. Stalin was a true Marxist, as Lenin himself noted.

Karl Marx [1818-1883]

Napoleon I Bonaparte [1769-1821]

The second source of his "political wisdom" was Napoleon I Bonaparte. A specific "*Napoleonic Marxism*" emerged as the "Stalinist" state ideology.

It was really embodied by Stalin in the practice of his construction of "socialism" in the USSR?

The Emperor of the French was Stalin's idol. Academician Tarle, the author of the most famous biography of Napoleon, was identified by Stalin as the author of the official biography of Stalin himself.

Stalin I.V. commissioned Academician E.V. Tarle to write the trilogy "The Russian people in the struggle against aggressors in the XVIII–XX centuries." *vk.ru*.

. The first part was to be devoted to the Northern War with Sweden of 1700-1721, the second with France - to 1812, and the third to the Patriotic War with Germany - of 1941-1945.stimul. Online.

Tarle began work and by the middle of 1950 he had prepared the manuscript of the first volume, with a volume of 40 printed sheets.

On June 12, 1950, he sent it to Stalin, but Stalin criticized it and ordered it to be rewritten. It was published in 1958 after Stalin's death. *stimul. Online*.

Stalin claimed to be the main figure of the Great Victory over Germany as the Supreme Commander in Volume 3 of the Patriotic War of 1941-1945.

Stalin's death on March 5, 1953 relieves Tarle of the obligation to present Stalin as the "Soviet Napoleon", Hitler's conqueror?

The history of the Great Patriotic War remained unwritten "under Stalin." The archives are closed. They try to write the history of the Great Patriotic War "for themselves" *first Khrushchev, then Brezhnev, then Zhukov?*

The prominent role of Army General Antonov, Chief of the General Staff of the Red Army, the author of 10 "Stalin strikes", whom Stalin awarded the Marshal's *Order of Victory*, deliberately distorted was by Stalin?

Stalin did not give him the rank of Marshal of the Soviet Union and did not award him the Gold Star Medal of the Hero of the Soviet Union. *But it was Army General Antonov who hosted the military parade on May 1, 1945 on Red Square.*

Brezhnev died suddenly of a drug overdose (?) and therefore did not have time to proclaim himself the second Generalissimo of the Soviet Union, following the example of Stalin?

Who could have prevented Brezhnev from telling the whole world the tale that Stalin himself allegedly came to consult him on military strategy during World War II?

In 1966, at the XXIII Congress of the CPSU, the status of the "General Secretary" of the Central Committee of the CPSU was restored and its leading role in the political system of the USSR was emphasized.

"*General Secretary*" was the position that J.V. Stalin held in the Communist Party of the Soviet Union.

General of the Army Antonov, Chief of the General Staff of the Red Army [1943-1945], awarded the Order of Victory. But Stalin did not award him the title of Marshal of the Soviet Union, nor did he award him the Hero of the Soviet Union Star.

Brezhnev, who also became the "General Secretary", probably had a desire to receive the second Order of Victory and the title of "Generalissimo of the Soviet Union" after Stalin? What would be the ultimate apotheosis of stupidity from the "Ship of Fools" of the 20th century?

The flight of Soviet cosmonauts to the Moon was banned by the political leadership of the USSR in the person of Brezhnev and Andropov. The flight of American astronauts to the moon was authorized by the American political leadership in the person of Nixon and Kissinger in the White House.

The Soviet cosmonauts on the Moon were to be led by cosmonaut A.A. Leonov. He told me directly that his spacewalk on March 18, 1965 was a preparation program for the flight and landing on the moon, which was prepared by S.P. Korolev. It was a direct test of the lunar suit.

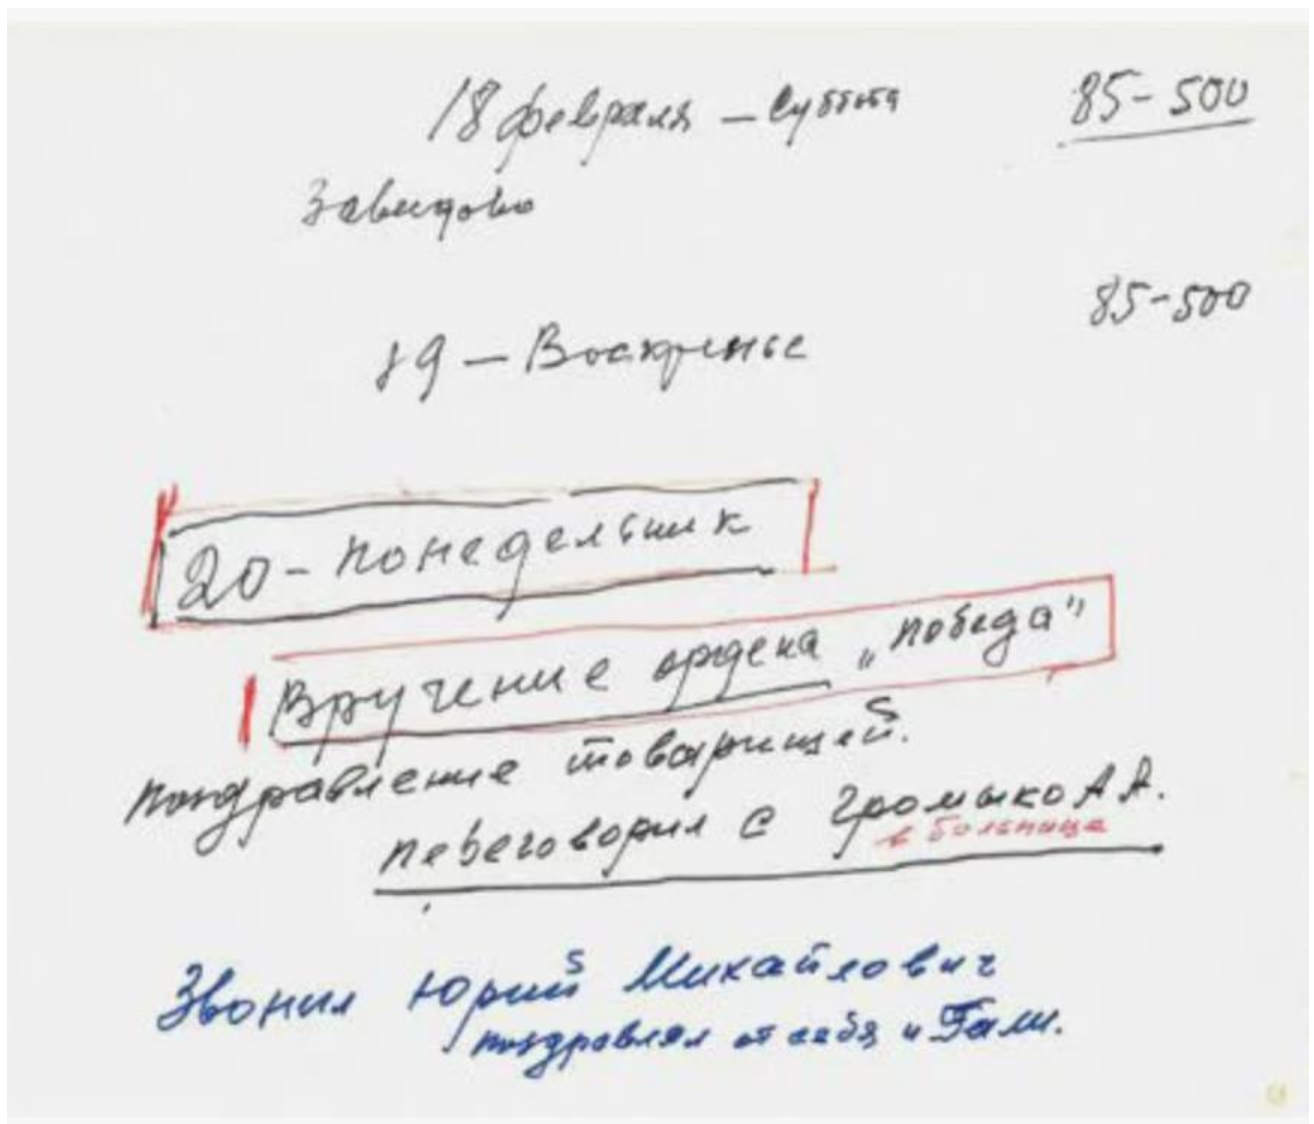

However, Brezhnev banned a flight to the moon without explanation. As compensation, Leonov was offered a flight under the Soyuz-Apollo program in 1975, the rank of major General and the second star of the Hero of the Soviet Union.

As an astronaut, A.A. Leonov was fully prepared for a flight to the moon. The flight itself was also technically prepared at the highest level of the space technology that existed in the world and in the USSR at that time. Back then, it was a one-time rocket technology.

Today, the technology of disposable rockets such as the American Saturn and the Russian Proton is simply outdated. Reusable rocket systems are needed today.

Brezhnev L.I. in an award-winning tunic with 5 Hero Stars. The psychopathological "competition" of Marshal of the Soviet Union Brezhnev with Marshal of the Soviet Union Zhukov G.K. in the number of awards?

The diary of L.I. Brezhnev with a note about the award of the Order of Victory to him on February 20, 1978. (The genuine, sincere joy of a clinical idiot?)

In the USSR, they flew on disposable Korolev [R-7] rockets and Chelomey rockets.

Chelomey's «Protons» flew well and made several successful orbits of the Moon with animals.

September 15, 1968, was the date of the launch of the Soviet heavy Proton launch vehicle with the Zond—5 interplanetary space station, which had turtles on board. dzen.ru; ru.ruwiki.ru

On September 18, 1968, Zond-5 completed the world's first flyby of the Moon at a distance of 1,950 kilometers from its surface, with a successful return to Earth. dzen.ru.

In the USA, after this successful flight with animals to the USSR, they took risks and immediately sent astronauts to fly around the Moon under the Apollo 8 program without their own intermediate test flights with animals.

The Americans launched on *December 21, 1968* and landed in the Pacific Ocean on *December 27, 1968*.

The flight lasted *6 days and 3 hours*. The Moon race *was lost* to the USSR.

A textbook on the Astronomy course has been canceled in a secondary school in Russia today. Schoolchildren, having passed the Unified State Exam [USE – “EGE”], are illiterate: they do not know what the "Big Bang" is, who scientists *Georges Lemaitre and Albert Einstein*, the authors of Modern cosmology, the science of the development of the Universe, are. At the same time, in the United States today, 70% of the population supports NASA's program to colonize the Moon by 2030 under the Artemis program, which schoolchildren in Russia do not know anything about.

Roscosmos has not yet learned how to calculate accurate lunar navigation using the unified universal LTC reference standard for Keplerian lunar time [7,8,9,10,11,12].

This LTC reference lunar standard is publicly available on the Internet [7.11] and has been successfully used as a state calendar in the Asgardia space state for more than 10 years.

At *Roscosmos*, all navigation calculations are still carried out according to the Julian Ancient calendar from 46 BC, which is 675 seconds longer on average than the size of the Keplerian tropical year [9] and 27 seconds of error relative to the length of the Keplerian tropical year [1627]. Isn't this "inaccuracy" the reason, among other things, for the next accident with the AMS Luna-25?

The application of the Keplerian unified universal reference standard for lunar time, [LTC], in the variant of the relativistic Einstein correction, will be a key moment in the colonization of the Moon, in particular, as well as in the colonization of the universe in principle, for many years to come. [7,8,9,10,11,12,13,14,15]

The system of anti-meteorite protection, the "*lunar*" weapon, should be created on the Moon.

The danger of meteorites such as the Tunguska meteorite, which had an explosive power of up to 40 megatons of TNT [equivalent to the explosive power of Academician Sakharov's most powerful thermonuclear Tsar bomb], should be foreseen from a permanent station on the Moon.

A system of anti-meteorite protection, a "*lunar*" weapon, should be created on the Moon. That's why we need "military bases" and "US space forces" on the Moon.

The *Tunguska meteorite* (also Tunguska phenomenon, Tunguska phenomenon, or Tunguska cosmic body) is a unique natural event that occurred on June 30 (June 17, Old Style), 1908 at about 7 a.m. local time in the Podkamennaya Tunguska River basin (Evenki district of the Krasnoyarsk Territory). kommersant.ru; bigenc.ru; ru.wikipedia.org*

They're counting. that if the Tunguska meteorite had fallen 4 hours later, the impact would have hit the densely populated city of Petrograd or Smolensk.

Therefore, it is important to have a round-the-clock global observation service on the Moon and on Earth at the same time to prevent meteor hazards.

THE ABSENCE OF A GOVERNMENT "SPACE DIRECTIVE" IN RUSSIA, AS A PRIORITY KEY TOPIC IN NATIONAL PROJECTS

In the USA, a boom in space industrialization began in 2017, which has become a global economic trend today. This is a direct consequence of the "US Directive No. 1 on Space Policy" dated December 11, 2017.

All the other countries in the world today have literally rushed to catch up with the United States. Now all the activities of the International Astronautical Federation (IAF and IAC) are aimed at solving the issues of space industrialization?

The Asia-Pacific Economic Cooperation (APEC) summit will be held in the Chinese city of Shenzhen on November 18-19, 2026.

This is the thirty-third annual meeting of APEC economic leaders. kommersant.ru; ria.ru; ru.wikipedia.org*. The leaders of the United States, China and Russia will meet there.

On December 14-15, 2026, a summit of the leaders of the G20 countries is scheduled in Miami (Florida, USA). tengrinews.kz; rbc.ru

The United States holds the G-20 presidency in 2026, and the event will be the final one of the American presidencies. tengrinews.kz

On January 17, 2013, my invention, the "Unified Universal Calendar for Humanity," was proposed to be considered for inclusion on the agenda of the G-20 Group meeting.

Can this important decision be made by US President Donald Trump alone, as US President Woodrow Wilson did in 1918?

Both Chinese Leader Xi Jinping and Russian President Vladimir Putin can support this decision. This event may be critically important for the entire earth's modern civilization, which is so dramatically transitioning into the space age. Would it be a Triple Treaty of World-historical significance?

The last such calendar reform was carried out 444 years ago [2026-1582=444] in 1582 by the Catholic Vatican, Pope Gregory XIII.

This "Gregorian" calendar was more accurate than the Julian calendar by 25 times [675: 27=25]. But the error of 27 seconds of overestimation per year in the Gregorian calendar remained. My calendar option eliminates this error completely.

The calendar I have proposed *has zero average error* relative to the length of the average tropical year calculated by Kepler, the founder of celestial mechanics.

In 2028, American astronauts have scheduled a landing on the Moon under the *Artemis IV* program.

On April 3, 2024, the US government officially proposed to NASA to calculate the unified reference standard for coordinated lunar time [LTC], taking into account the relativistic Einstein correction [LTC standard]. Such a development was carried out by me and officially published on the Internet on July 10, 2024.

Morozov S.L. «Morozov`s calendar for the Earth and the Moon»
[Electronic resource]

URL: <https://calendar-morozov.space/en.php?ysclid=mte0lh09yt93452100>
(Accessed July 26, 2026)

Starting in 2028, the United States plans to build a city on the Moon for permanent residence of "lunonauts."

All navigation on the Moon and in near-solar outer space will be based on the coordinated LTC standard of lunar time, tied to the prime meridian [at Greenwich], coordinated with Earth time. [6,7,11,12,13,14]. This time is the unified and common reference standard for the Earth-Moon binary planet.

This calendar has been officially implemented since 2016 and has been successfully operating in the Asgardia space state for 10 years. Thanks to Asgardia, it is easily accessible and is available in every phone today.

In the United States, the construction of a powerful Starbase spaceport on the territory of Louisiana on the Gulf coast is proceeding rapidly [2].

Russia still is unable to make a decision on the construction of the Far Eastern Space Complex? Russia has neither modern spaceports, nor modern reusable rockets [5], nor modern lunar navigation?

In August 2026, President Trump signed a memorandum that suggests increasing the number of space launches to *several thousand launches per year* by 2030. The territory of the spaceport in Louisiana has been expanded to 506 km². The moon will be colonized by the United States with permanent bases built like comfortable homeostatic arks [1].

In Russia, the banking system is basically not ready and unable to ensure the development of the space state.

Russia does not have a state priority program for space colonization. There is still no understanding of the priority importance of the topic of total space industrialization. [15]

The Soviet space industry was destroyed by the actions of Brezhnev, Andropov, Gorbachev and Yeltsin. Nothing new or modern has been created. The era of disposable rockets ended in 2010. But the production of reusable rockets in Russia has not even begun?

At the same time, in Russia, for some reason, the banking sector prefers the construction of 260 skyscrapers only in Moscow?

Even Sebastian Brant [Sebastian Brant, 1457-1521] would probably have questions with his "Ship of Fools"?

For some reason, no artificial intelligence programs have been helping in solving these issues for decades? Officially, about 20 million people in Russia live in conditions below the poverty level?

The average level of economic development in Russia from 1991 to 2026 does not exceed 1% per year? This look strange against the background of the amazing economic growth of China and India over the same period?

Elon Musk is building 10 launch pads at once at Starbase for his superheavy steel StarShip rockets. This is an event of historical global scale.

The papal bull of Pope Gregory XIII, which reformed the Julian calendar [with its annual error of lengthening the year by 675 seconds relative to the length of the tropical year], which marked the beginning of the Gregorian calendar with an average error of 27 seconds per year, was also undoubtedly a global historical event.

The bull was issued by the Vatican on February 24, 1582. *ru.wikipedia.org**; *regnum.ru*; *eadaily.com*. The document was named after the first two words of the Latin text: "Inter gravissimas Pastoralis officii Nostri curas ..." ("Among the most serious duties of our pastoral service ..."). *ru.wikipedia.org* *; *regnum.ru*; *eadaily.com*

The bull was signed in Tusculum (now part of Frascati). The text of the document states: "Datum Tusculi, anno Incarnationis dominicæ MDLXXXI, sexto Kalendas Martii, pontificatus nostri anno X."

It means: "Signed in Tusculum, in the year of the Incarnation of the Lord 1581, on the sixth day before the Kalends of March [February 24]; in the 10th year of our pontificate." In fact, the document was signed by the Holy See in Rome on February 24, 1582, in a new style. *ru.wikipedia.org**

The proposed space calendar will need to be reviewed at the UN General Assembly and adopted by all 193 UN members. The initiator may, for example, be India. India has already taken such an initiative to replace the Gregorian calendar. In 1953, the Government of India submitted to the United Nations a "Memorandum on World Calendar Reform."

The delegation of India suggested returning to the issue of standardization of the calendar, as there were about 40 calendars and 5 different historical and chronological eras in the country. *vk.ru*; *studfile.net*; *ru.ruwiki.ru*.

In 1954, the *United Nations Economic and Social Council* approved a draft permanent calendar that *eliminated the sliding of the days of the week by the numbers of the months and the splitting of weeks between quarters*.

13 undivided seven-day weeks were set up in each quarter, and at the end of the year, instead of December 31, they proposed the holiday of Peace. *litlife. club*.

It was a project of the League of Nations that existed before the Second World War. However, the draft was not adopted, and since 1956, the work of calendar reform in the United Nations has not progressed. Why?

This was due to objections from the Vatican to the reform of the Catholic traditional calendar. *litlife.club; ru.ruwiki.ru*.

But the need to colonize the Moon and cosmic velocities make the Gregorian calendar unacceptable, with its annual error exceeding 27 seconds in relation to the length of the tropical year calculated by Kepler.

For this reason, the unified (common) standard reference coordinated [LTC] lunar time will be used on the Moon and on Earth, derived from the "Unified Universal Calendar for Humanity", synchronized with coordinated terrestrial time.

It has already been created, is successfully operating and is publicly available on the world Internet.

The calendar of the space state of Asgardia has been successfully using an accurate space calendar model for 10 years.

It is constantly used globally by thousands of people all over the globe who have installed it in their phone.

Morozov S.L. «Morozov`s calendar for the Earth and the Moon»

[Electronic resource]

URL: <https://calendar-morozov.space/en.php?ysclid=mte0lh09yt93452100>

(Accessed July 26, 2026).

My reports were heard at the "royal" readings at the Bauman Moscow State Technical University in 2025; at readings in Kaluga dedicated to the memory of Tsiolkovsky in 2024; at the annual session at the IIET RAS in 2024; at the international conference in Darmstadt [Germany] in 2019.

A permanent international website on the Internet for 10 years, starting in 2016. Dozens of publications.

The calendar theme is currently at the peak of the progress of space industrialization. Historically, is this a problem exclusively for the collective of all Heads of State in the UN system?

The Julian calendar was introduced by the Roman Emperor Gaius Julius Caesar in 46 BC.

The Gregorian calendar was introduced by the head of the Roman Catholic Church, Pope Gregory XIII, in 1582. The United Nations today uses this obviously outdated medieval calendar as an international one.

Who will present the new "Single Universal Calendar for Humanity" at the UN in 2026? Which of the heads of the 193 modern UN member states will make such a proposal? The invention was made in Russia.

The model works well on the example of the space state of Asgardia, but Asgardia itself is not yet a Member of the United Nations.

The "Unified 13-month Universal Calendar for Humanity" is the key *supranational* project of space industrialization. Colonization of the Moon and the Universe is impossible without it.

Dr. Igor Ashurbeyli is the Head of the Asgardia space State.

History today is looking for and waiting for "its president" instead of the "garbage heap" that is most likely to remain after the Third World War of what is now called "human civilization"?

China, Russia, and the United States can will combine their Moon colonization programs in 2030, using the convergence resource as a way to boost global space industrialization and reduce costs? They will be able to turn space into the main instrument of world politics?

The resources of planet Earth are limited. The technological convergence of China, Russia, and the United States will have certain global consequences if it happens?

The "trilateral agreement" possible between Donald Trump, Xi Jinping and Vladimir Putin?

In this case, it be a new, sixth global (information and space) socio-economic formation named after K.E. Tsiolkovsky, which will ensure the exit of civilization into the universe?

The United States and the space state of Asgardia in this regard are de facto ahead of all other participants in the global progress in the field of manned space exploration?

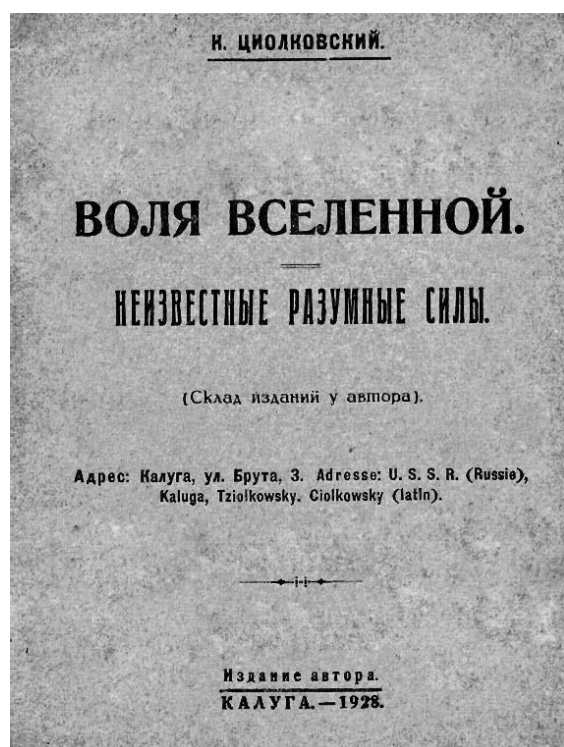

THE RELATIONSHIP BETWEEN SCIENCE AND RELIGION

Technologically backward countries, as a rule, are not needed by anyone on their own. Are they trying to get rid of them, like getting rid of useless ballast? This is why the creation of the "big three in space" will allow all countries of the planet to gradually join the process of total space industrialization?

It is obvious that a single Earth-Moon binary planet needs to have an accurate unified reference standard time and an accurate unified reference standard calendar?

It is quite obvious that the time has come for civilization to move, figuratively speaking, from the Medieval "Ship of Fools" to the modern "Starship" Elon Musk?

It is necessary to move from the prehistory of Mankind on Earth to the true history of Human Civilization in the vastness of the universe – to the cosmos of K.E. Tsiolkovsky, who himself was *Orthodox* and was married to the daughter of an Orthodox priest?

K.E. Tsiolkovsky's monograph with his arguments about possible Unknown intelligent forces of the Universe.

In 1927, the President of the Pontifical Academy of Sciences in the Vatican, a Christian priest from Belgium, the Jesuit *Georges Lemaitre* and the Jew *Albert Einstein* created modern cosmology, the science of the development of the universe.

They created the modern theory of the Big Bang and the creation of the universe 13.8 billion years ago, which corrects the primary hypothesis of the Ancient World set forth in the Ancient Bible in the chapter "Genesis" about the alleged 6 days of the Creation of the Universe. Today, the modern "Being" of the Big Bang defines the consciousness of human civilization.

The celestial mechanics of Kepler-Newton-Einstein is the basis of the Exodus of all mankind into the universe. Religion and Science have historically gone hand in hand and together, through the contradictions of development, contribute to the progress of Humanity in the end.

Humanity, in connection with the coming era of colonization of the Moon [Exodus to the Moon – a kind of "lunar Easter"], must switch to the unified reference standard of the lunar-terrestrial 13-month calendar and to the unified "coordinated lunar time" for the Moon and the Earth. [7,8,9,10,11,12,13,14,15].

Musk spoke about plans for the first orbital flight of the Starship spacecraft to create the multi-planetary humanity, starting with the colonization of the Moon.

SpaceX is seeking to certify Starship for orbital flights, an important step towards missions to the Moon and Mars.

According to media reports, in 2027, NASA plans to test the Orion spacecraft in low-Earth orbit with one or both commercial landers created by SpaceX and Blue Origin. The first manned landing on Moon under the updated Artemis program is scheduled for 2028.

The second launch complex for Starship is almost completed at the Kennedy Space Center in Florida, the third is planned in Louisiana. It is simply impossible to stop this process of total space industrialization of the United States by any "conservatism"? A new space age in action.

The next, 15th test flight, is scheduled in three weeks. Some investors have expressed concern about the company's ambitious plans for AI and rocket science, as well as its high valuation of \$2 trillion.

Starship is designed to replace SpaceX's reusable "workhorse" Falcon 9 rocket, which will allow the company to strengthen its monopoly position in the satellite launch market.

It is only a matter of time before the United States builds strategic military bases on the Moon? The United States Space Force was established on December 20, 2019. *ru.wikipedia.org**; *ru.ruwiki.ru*.

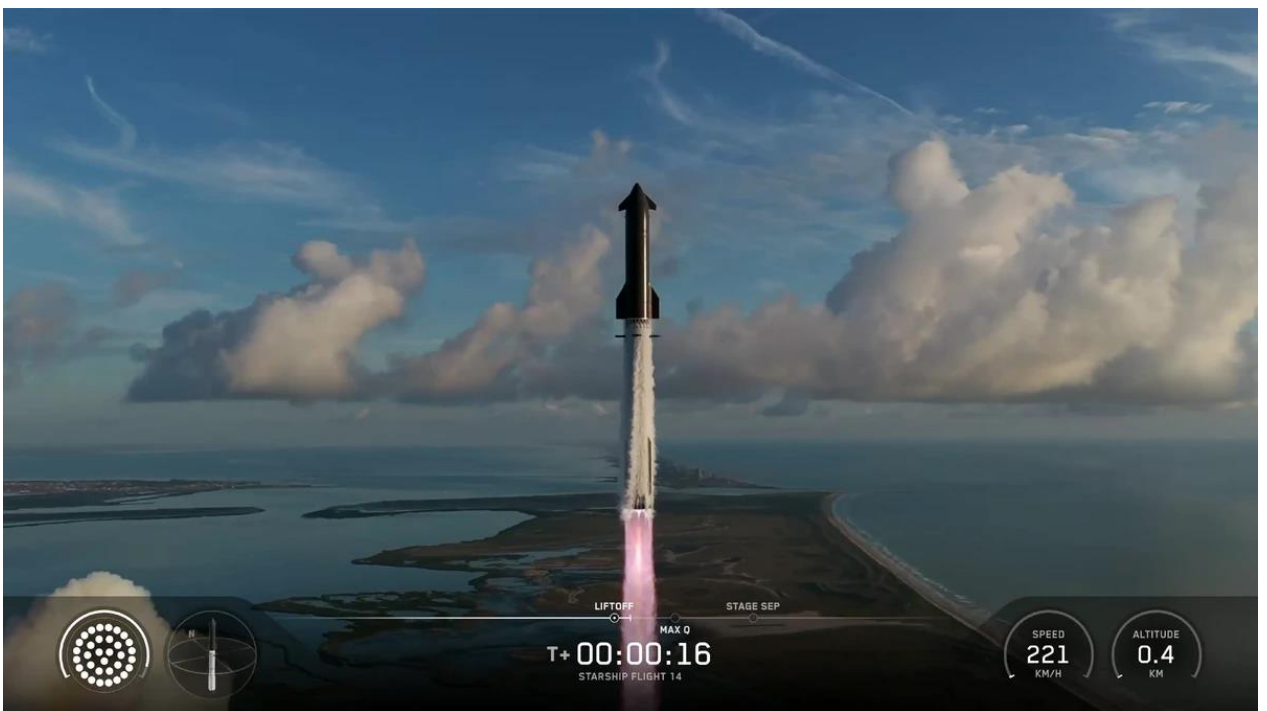

And the power of the Global Hegemon will be based on this. Sebastian Brant's "Ship of Fools" [Sebastian Brant, 1457-1521] remain "in the fools" on Earth when it will collide simultaneously with 10,000 Elon Musk's spaceship ships in real life?

September 23, 2026. The first Starship orbital rocket was assembled and installed on the launch pad.

September 27, 2026. The Flight 14 assembly is fully formed at the Starbase cosmodrome in the Gulf of Mexico.

September 28, 2026. Flight 14 launch [lunar time is specified to the minute - **05:049 LTC** – the same absolute lunar time for all 24 time zones of the Earth]

(Accessed July 26, 2026)

15:48:59 Moscow time [specified to the second] — launch time [absolute lunar time is specified to the minute - **05:049 LTC** – the same (common) for all 24 time zones of the Earth] rocket Starship Flight 14, September 28, 2026, from Pad 2 Starbase cosmodrome, located near the village of Boca Chica in the south of the US state of Texas. *science.mail.ru*

At about 19:00 Moscow time, the landing time [absolute lunar time is indicated to the minute — **06:096 LTC** - the same (common) for all 24 time zones of the Earth] of the Starship spacecraft, which completed its orbital flight ahead of schedule, spending about three hours in near-Earth space instead of the planned ten. *tvzvezda.ru*;

All the main events of the initial stage of the flight took place according to the calculated cyclogram:

at 15:48:59 Moscow time, Starship 41 lifted off from the launch pad;

at 15:51 Moscow time, the hot separation of the stages took place;

at about 15:56 Moscow time, Super Heavy completed its landing impulse and landed in the Gulf of Mexico;

at 15:57 Moscow time, StarShip 41 turned off its engines after initial acceleration;

from 16:14:16 to 16:14:35 Moscow time, one of the Raptor engines performed an orbital impulse;

from 16:23 to 16:54 Moscow time, the ship StarShip has deployed 26 Starlink V3 satellites.

Отзыв

на научную работу С. Л. Морозова
"Единый универсальный календарь для человечества",
представляющую собой детальный материал для возможного включения в
повестку работы заседания Группы G-20.

Как известно, в мире действует около десятка различных календарей,
возникших исторически на основании политических, религиозных и иных
соображений.

В работе Морозова впервые в истории разработан универсальный календарь
из чисто научных соображений, который все имеющиеся в мире календари
объединяет и не содержит известных недостатков в этих календарях.
Объединяет в том смысле, что новый календарь является идеальным
инструментом для согласования действующих календарей, что становится всё
более актуальным в связи с глобализацией, космическими полетами и пр.

Разработка Морозова удовлетворяет современным научным критериям и
вполне может быть представлена не только научному сообществу, но и на
высоких политических мероприятиях.

У меня актуальность вынесения вопроса об универсальном календаре на
мировой уровень для обсуждения не вызывает сомнения. Мировое
пространство уже столь загружено разными объектами, что без единой
системы согласования действий в этой области управление становится
невозможным.

УКАЗ № 38 О введении в действие календаря Асгардии от 16 Capricornus 0003 (18 декабря 2019 года).

Decree No. 38 On the Implementation of the Asgardian Calendar of 16 Capricornus 0003 [0003+2016=2019] - (18 December 2019).

THE EPILOGUE

Figuratively speaking, it should be recognized that the planet Earth is temporarily inhabited by short-lived biological self-replicating DNA automata. Their lifespan is limited by the genetic patterns of DNA and RNA systems.

Biological people who live relatively short lives actively create non-biological long-lived self-reproducing automata themselves. These robots, including their anthropomorphic varieties, are similar in appearance to humans with a high degree of formal accuracy "in the image and likeness", in fact, in their longevity are in no way related to genetic patterns.

Their life span will be practically unlimited, since the materials from which they reproduce themselves are constantly being improved by them and become very durable, reusable and interchangeable.

The combination of biological cybernetic self-replicating automata [BA], including humans, and communities of non-biological self-replicating cybernetic automata [NBA][15] described by Wiener and von Neumann gradually conquer the Universe?

They own the Future in the Universe? Perhaps such objects already exist in the vastness of space? Tsiolkovsky K.E. called them "Unknown intelligent forces" or "The Will of the Universe" [1928].

SPECIAL CONDITIONS

Creating a combination of two satellite systems: 1) polar with an inclination of 90°; and 2) equatorial with an inclination of 0° - allows control over 98% of the entire Earth's surface. All launches and all landings will be easily monitored from these positions.

At the same time, the same combination of satellite systems allows you to monitor all launches and all landings on the Moon using a special repeater located at the Lagrange point behind the Moon to monitor the far side of the Moon, as has already been done by experts from China.

The country that creates such a global satellite system, consisting of two parts – the polar and the equatorial - will become the «*Global Hegemon*».

Without her consent, no spacecraft will take off or land on Earth or the Moon. Only the United States can really become such a country today.

Therefore, the words of US President Donald Trump that "The Moon belongs to the USA" should not be considered a formal "figure of speech."

No country in the world, except the United States, currently possesses reusable superheavy steel planet-ship rockets.

No country in the world, except the United States, has a "Starbase" for their mass assembly line launch of thousands of units per year.

No country in the world can have an entire fleet of several thousand spaceships. It will be the absolute "golden dome" of the USA over the whole world?

The hegemony in space of the multi-thousandth space fleet of planet-ships and the US space forces is the real power of the United States over the rest of the world, which the US will leave to rot on "traditional" Earth, and which will become the embodiment of the medieval devalued to minus zero "Ship of Fools"? *This is a real triumph for US President Donald Trump?*
